

Mohammed Zomlot

Front-End Web Developer

mhzomlot@gmail.com | github.com/MohammedZomlot2007 | linkedin.com/in/mohammed-zomlot-02315a435/

PROFILE

Front-End Web Developer focused on building modern, responsive, and user-friendly websites using HTML, CSS, and JavaScript. Interested in polished interfaces, interactive dashboards, business products, responsive systems, and practical client-side experiences.

CORE SKILLS

HTML	CSS	JavaScript	Responsive Design	UI Design	DOM
LocalStorage	Git	GitHub	Interactive UI	Dashboards	3D / Motion

SELECTED PORTFOLIO WORK

Accounting Pro Enterprise

Enterprise accounting dashboard - HTML / CSS / JavaScript

Business-focused interface covering dashboard patterns, financial summaries, invoices, customers, purchases, reports, and responsive navigation.

Gold Jewelry POS & Accounting

Specialized retail POS concept - HTML / CSS / JavaScript

Domain-specific interface for jewelry retail with weight, karat, gram price, craftsmanship, sales, purchases, inventory, and customer flows.

SAWWER

AI / transcription product UI - HTML / CSS / JavaScript

Focused workspace concept for audio upload, transcription, file history, playback, text search, and export interactions.

TRADEON

Business platform concept - HTML / CSS / JavaScript

Responsive business experience featuring profiles, search, filters, content patterns, and calm product-oriented layouts.

SERVICES

Responsive Websites	Modern interfaces for desktop, tablet, and mobile.
Landing Pages	Structured, conversion-focused front-end experiences.
Business Dashboards	Professional interfaces for operational and data-heavy workflows.
UI Redesign	Modernize outdated interfaces with better hierarchy and interaction.

WORKING STYLE

Understand the goal -> plan the interface -> establish spacing, typography, and component rules -> build with semantic HTML, clean CSS, and vanilla JavaScript -> test responsiveness and keyboard interaction -> polish motion and performance.
